ADEYO

Industrialize your Dreams !

Made in Portugal

**Multimedia Kiosks and Digital Billboards are developed and produced in Portugal.**

The success of our company in the international market shows us that we have developed and produce excellent products and we should therefore be proud and confident in the future.

**Patented Product / Design**

## INNOVATIVE COMMUNICATION PLATFORM

ADEYO model was designed for both indoor or outdoor (with additional cooling systems and protection).

This Kiosk is designed specially for multimedia advertising purposes and support large displays (32" to 103"). The two sides of the kiosk are designed so that there is a great versatility.

# BIG CITIES BIG ADVERTISES

## Incredible Sharp & Brightness

ADEYO was developed to have protection against dust conditions and high temperature ambients. It is available with bespoke air conditioner system that provides good and liable working conditions.

ADEYO is equipped with high brightness display panel for outdoor installations and with tempered security glass with AR and UV filters or coating (optional) that guarantees optimal protection against solar beams and increases panel MTBF.

The exclusive bespoke air conditioner system (combination of Ventilation and air conditioning), guarantee the optimal functionality in "Sun mode" up to +55°C (outside).

## SideDisplay

ADEYO can be customized in terms of design and functionalities, such as the integration of an additional interactive side display.

With this configuration, numerous possibilities exist such as provide interactivity and advertising simultaneously.

You can configure ADEYO with 2 large displays (on each face) for advertising and double sided small interactive displays, allowing to create an impressive multimedia device.

With this configuration it acquires numerous possibilities like interactivity and advertising on both sides simultaneously.

# DoubleSided

The ADEYO was specially developed to enable the presentation of dynamic advertising, commonly called digital signage.

The ADEYO was also developed so that can have multiple configurations, so being as versatile as possible. One possible configuration is to use two displays, one on each side, thus creating a powerful advertising equipment with the possibility of also providing the equipment of interactivity on any of the faces.

Our engineers and designers have taken care to create a solution which in addition to innovative technology represents a distinctive mark in regard to the design, usability and ergonomics, since able to maintain the identity of the product, whatever the configuration or components used.

## DoubleDisplay

Double Interactive display.

## DoubleSided Display V1

Double Interactive display with side integration.

## DoubleSided Display V2

Double Interactive display with side integration.

## The Brain

The ADEYO is extremely technologically advanced, mainly because integrating a bespoke ECU (electronic control unit) that insure systems and electronic components are always operational, with remote web management control.

In case of emergency, self-protection procedures, such disconnecting display or cpu, hvac stops and starts, power off entire system, with automatic failure notifications (email or sms) will ensure that the system is more reliable and secure as possible.

# Controlled By SMS

With The Brain system is possible to receive status information of the devices through SMS or through the webportal The Brain.

This allows authorized users (ex: technical staff) to receive at mobile phone or smartphone alerts and also operate on the devices installed in ADEYO through SMS. As example, a simple SMS with the text "Display Off" will turn off the display of a particular kiosk.

# Web Portal Application

One of the most innovative features of ADEYO is undoubtedly the advanced remote control system THE BRAIN.

This system is fully developed by PARTTEAM DREAMLAB division and which is composed of a set of hardware and software.

The hardware is a bespoke ECU (electronic control unit), installed in each ADEYO and that insure systems and electronic components are always operational.

This ECU besides possessing “intelligence” through algorithms and pre-programmed functions that allow to make decisions autonomously, is connected through the network to a web portal that further enhances the capabilities of this device.

The webportal THE BRAIN is a fantastic tool for managing and monitoring, which allows not only perform monitoring functions and reception status of all the components that are installed in each ADEYO, as ontime also perform actions on all equipment which is connected the ECU in each kiosk.

THE BRAIN webportal has a set of graphical visualization tools and pie charts that allow for a quick and intuitive way to realize the state status of each component in a particular kiosk or in a group of kiosks

TECHNICAL SPECIFICATIONS

## TECHNICAL FEATURES

### Type

- Indoor / Outdoor

### Materials

- Painted Steel
- Stainless Steel

### Options

- WI-FI
- Webcam
- Interactive Display
- Bluetooth
- Speakers
- Dipslay MultiTouch
- Protection Glass

(Other options available upon request)

(Approximate and variable measures, depending on the customization of the kiosk)

A.220 L96 P18 cm  
(Aprox. With 46" Screen)

Displays:  
32" to 95"

175 Kg.  
(aprox.)

Steel plate  
1,5mm / 2,5mm

Integrated  
speakers

Stainless steel AISI304/316,  
Painted steel

## OPTIONAL

Displays: 32" to 96"

Available in any RAL color

Computer: Atom, Dual Core, Core i3, i5 ou i7

Full customization

Updated Operating Systems: Windows, Linux, Mac\*  
\* depends on the type of touch technology used

Wireless - WLAN

Touch screen (SAW, Infrared, ProCap)
