

Qtouch Easyfix

Touch...the sky!

Made in Europe

Multimedia Kiosks and Digital Mupis are developed and produced in Portugal.

The success of our company in the international market shows us that we have developed and produce excellent products and we should therefore be proud and confident in the future.

Qtouch Easyfix

Simplicity and functionality

THE INNOVATION OF MULTITOUCH

The QTOUCH model and the QTOUCH EasyFix model are almost the same except that the easyfix allows placing the tablet or IPAD in a easier and faster way through the front door.

It was designed for indoor use only and to be integrated into an IPAD/Tablet. Could be used as an Information Point of the institution /company where it is installed, Internet access point or for any application that can be developed for the IPAD/Tablet PC.

It can also be used for public or private institutions to attend the clients where, somehow, a management service / waiting queues is needed, by simply installing a printer for tickets.

Using and easy integrating tablets in this kiosk makes possible to have several dimensions of multitouch displays, and to have smooth touch operation, as tablets usually have very smooth glass surfaces.

Using tablets integrated in this kiosks will also allow to benefit all the applications that are available to download (free or pay) at AppleStore, PlayStore. etc

The use of tablets in this kiosks also give to this kiosks some level of security, as tablets usually have glass scratch proof.

This model can be manufactured in stainless steel AISI 304 or painted steel (available in all RAL colors) using steel plate of 1,5mm to 2mm.

The Qtouch Easyfix model can be equipped with IPAD/Tablet PC of any available brand in the market (Samsung, Asus, Toshiba, etc.).
