APOLO

Touch...the sky !

Made in Europe

**Multimedia Kiosks and Digital Billboards are developed and produced in Portugal.**

The success of our company in the international market shows us that we have developed and produce excellent products and we should therefore be proud and confident in the future.

Patented Product / Design.

## MINIMALIST AND ELEGANT

APOLO is a multimedia kiosk, designed with simple and modern lines for indoor or outdoor spaces.

The versatility of this model is one of its greatest assets. Equipped with a touchscreen monitor, of variable sizes, can easily be adapted the most diverse components and functionalities.

It has two speakers and two independent ventilation systems, one for the monitor and one for PC.

## VERSATILE AND CONTEMPORARY

The simple and elegant design of APOLO gives it high adaptability to the most varied environments and markets. It stands out for its functionality and good ergonomic practices for the user.

## LOW THICKNESS **MAXIMUM PERFORMANCE**

PARTTEAM & OEMKIOSKS constantly develops new methodologies to achieve the highest aesthetic standards in its products.

An exuberance of design, only achieved with the application of the latest technologies and production methods.  
APOLO has details and rigorous finishes, worked by hand.

# CUSTOMIZATION WITHOUT LIMITS !

We constantly develop new projects that follow the needs of our clients, with several options of technical or visual customization.

APOLO can be manufactured in stainless steel or painted steel (available in all RAL colors) using steel plate from 1.5mm to 2.5mm, which guarantees the stability and rigidity of the entire structure.

# STYLE AND STABILITY

Minimalist lines give a light and incredibly modern look to the kiosk. This in conjunction with the compact and solid structure, conveys an image of simplicity, style and robustness.

## INTERACTIVE TECHNOLOGY

TOUCH... THE SKY !

APOLO was developed to allow the integration of any type of touch screen, creating an interactive device.

PARTTEAM & OEMKIOSKS has a unique experience in the field of interactive technologies, which enables them to be integrated in APOLO in an efficient and professional way.

## MULTI TOUCH

Larger touch technologies can be used, each optimized for different operating characteristics and environments to meet the needs of customer applications, such as SAW (Surface Acoustic Wave), Capacitive, Infrared, Optical, Capacitated, Procap, etc.

The interactive APOLO is available with 10" to 103" displays, with a unique touch to 40 independent tones and with the possibility of interaction with finger, hand, gloves and pointer.
