Century

Interactivity with dimension

The Century model was designed for both indoor or outdoor applications.

This model can be manufactured in stainless steel or painted steel (available in all RAL colors) using steel plate of 1,5mm to 2,5mm which ensures the stability and rigidity of the all structure.

This kiosk was developed especially for use in windows, in that its design allows the display becomes flat against the glass of the inner window, while still allowing interactivity on the outside of shop window, with the use of capacitive technology proposed.

This Kiosk is designed specially for multimedia advertising purposes and support large displays (32" to 108")

This kiosk can also be equipped with touchscreen technology and Audience Measurement system.

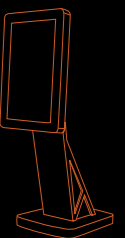

The area where the PC will be installed has security locks, general switch and is easily detachable, leaving enough space for the installation and access to a minitower PC.

On the side of the monitor are two speakers and the kiosk has 2 independent systems of ventilation, one for the monitor and other for the PC.

The Century is normally equipped with high-performance computer, with any range of CPU, 160 GB hdd or higher, 2 GB RAM, 10/100 Mb network card and any operating system (Windows, Linux, etc.), but is usually equipped Windows 7 Home or Professional Edition.

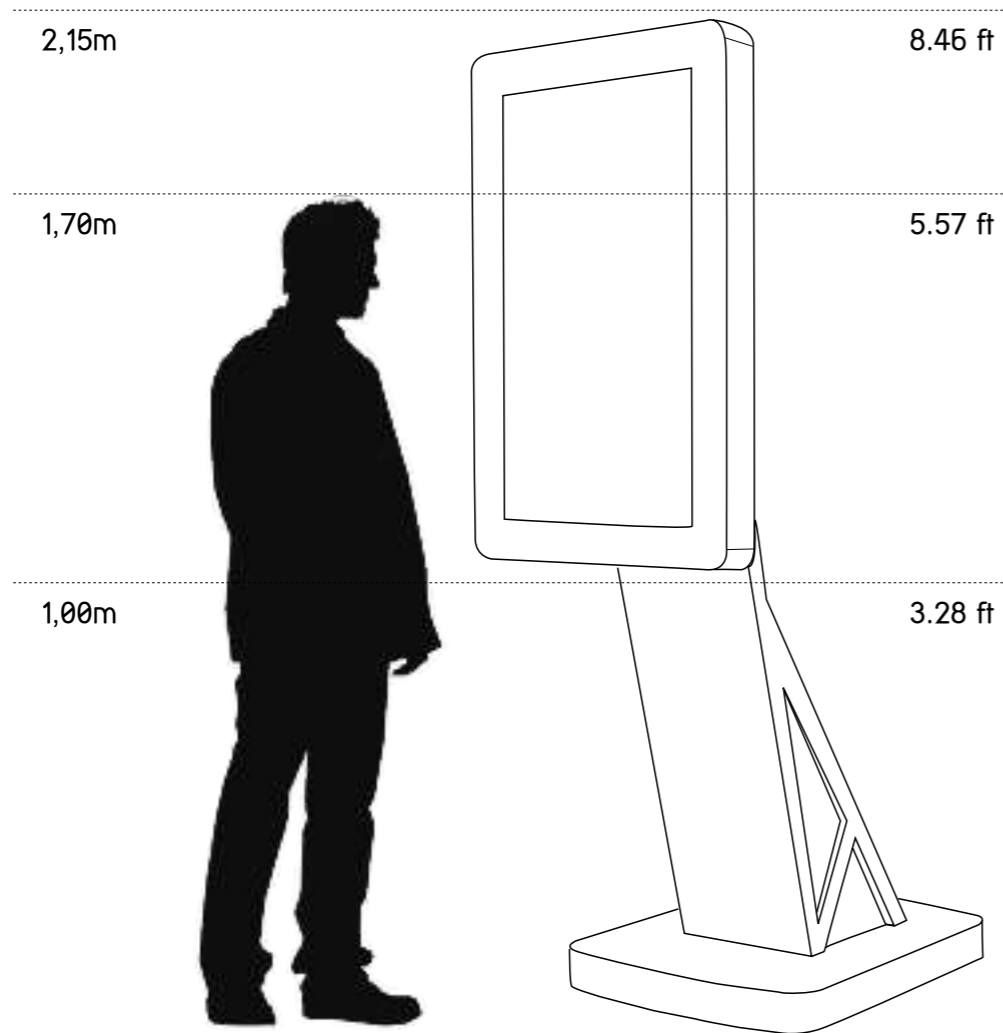

Technical Specifications Century Kiosk

Dimensions: H2150 x W800 x D110
Weight: aprox. 120 Kg.

Century

Distance comparison and main features

The dimensions of the kiosk may vary depending of the components used.
