DINK

Industrialize your Dreams!
Multimedia Kiosks and Digital Billboards are developed and produced in Portugal.

The success of our company in the international market shows us that we have developed and produced excellent products and we should therefore be proud and confident in the future.
Modern, smart and affordable design!

The use of multimedia kiosks is increasingly common for public display of all types of products.

The sober yet modern lines of this equipment, coupled with interactive technology, give kiosks an unusual ability to provide independent information to potential customers of the product being presented.
Interactive kiosk

Modern design in the projection of multimedia content.

The DINK kiosk can be used with SAW, Infrared or even ProCap technology displays with the possibility of interactive display and anti-vandal keyboard.
Queue line management

This kiosk model, coupled with queue management and attendance management software, allows customers to be optimized and, above all, to organize and manage callers in an effectively, quickly and simply way.
Perfect details.
Simple and functional.
Customization to measure!

You can customize and apply your company branding or any promotional campaign on vinyl or other materials, as well as add components.
Virtual seller

The DINK model here in the keyboard version excels in its sober but simultaneously modern lines.

This is an excellent model widely used as an interactive information point.

The versatility of this model is also one of its assets as it easily adds components such as printer, keyboards, among others.
Effective double display solution

It is possible to change the DINK in terms of design by placing an additional display.

With this configuration, countless possibilities open up, such as providing Dink with interactivity and simultaneously advertising on each of the displays.
Give your customers more autonomy!
Versatile and modular kiosk

This kiosk is an example of a self-service fulfillment and payment kiosk with integration of payment systems such as coin purse and card readers.

They can also be used to buy self-service meals for restaurants, ticketing systems, hotels, gyms, etc.

DINK check-in kiosk offers a multitude of additional options aimed at improving services and processes in the hotel sector.

Checking in and out of the hotel without human intervention, consulting tours and making reservations has never been easier.
