Multimedia Kiosks and Digital Mupis are developed and produced in Portugal.

The success of our company in the international market shows us that we have developed and produce excellent products and we should therefore be proud and confident in the future.
MODERN, SIMPLE AND FUNCTIONAL

The QUARTZ model is designed for indoors use only.

Could be used as an Information Point of the institution / company where it is installed, Internet access point or for any application.

It can also be used for public or private institutions to attend the clients where, somehow, a management service / waiting queues is needed, by simply installing a printer for tickets.

The easy integration of displays and tablets makes it possible to enjoy various dimensions of multitouch displays, 10” to 22”.

This model can be manufactured in painted steel (available in all RAL colors) or stainless steel AISI 304 using steel plates of 1.5mm to 2mm.

QUARTZ can be equipped with computers with different "performances"(CPU) with hard drives from 100 to 320 GB, 4 Gb Ram Memory, 128mb graphics card expandable to 512, 10/100 mb ethernet, and Windows 7 or 8. This kiosk can also be equipped with computers with other OS like Linux, etc.

The dimensions and specifications are given in graphical representation and may not correspond to the reality of the equipment. The dimensions shown are approximate and represent the equipment for a certain size display.

The final dimension may vary depending on display model and other components used. The client must request technical drawing for final validation (measures and specifications).
PROJECTION AND INTERACTIVITY

The use of multimedia kiosks is becoming more common in the public presentation of all types of products and services.

With sober lines but simultaneously modern, this digital kiosk (QUARTZ model), coupled with interactive technology has an ability to provide products or services information to potential customers or visitors.

The dimensions and specifications are given in graphical representation and may not correspond to the reality of the equipment. The dimensions shown are approximate and represent the equipment for a certain size display. The final dimension may vary depending on the display model and other components used. The client must request a technical drawing for final validation (measures and specifications).

**Interactive Technology**

**Touch the sky**

QUARTZ was developed to allow integration of any type of touchscreen technology, thus creating an interactive device for indoor or outdoor.

OEMKIOSKS unique experience in the field of interactive technologies, Allows Them to be integrated in QUARTZ effectively and professionally.

In outdoor kiosks, Procap technology may be integrated into QUARTZ, Thus Allowing the touch to be Performed on glass surface, giving QUARTZ extreme security against vandalism.

**Multitouch**

Widest touch technologies can be used, each optimized for different operating characteristics and environments to suit application requirements of customers, like Surface Acoustic Wave (SAW), Capacitive, Infrared, Optical Imaging and Projected Capacitive (ProCap), etc.

QUARTZ interactive is available from 10” to 22”, from single touch to 40 independent touches, and with finger, gloved hand & pointer inputs..
