Touch...The Sky

Square K

The interactive table for Kids

The Square K model was developed for indoors use, (schools, shopping, restaurants, coffes) especially by children, but can also be used by adults.

This model can be manufactured in stainless steel or painted steel (available in all RAL colors) using steel plate of 1,5mm to 2,5mm.

This kiosk was designed to support the new technologies available in the market. You can either have a touchscreen display but also an amazing multi-touch interactive display of 19" (or more) that functions as a virtual table.

We can see pictures, increase, reduce, move, insert a USB flash drive, copy files etc.. Several functions that we can do with a group of friends gathered at this future table.

Due to the unique design, besides a multimedia kiosk, Square K is a piece of decor that will fit in any leaving room, school, restaurant, shopping center, or others.

On the side of the monitor are two speakers and the kiosk has 2 independent systems of ventilation, one for the monitor and other for the PC.

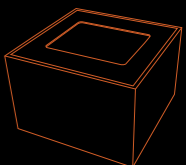

The Square K Model can be equipped with a Atom CPU with a 160 GB hard drive, 1 Gb Ram Memory, a 128Mb graphic card and a 10/100 mb ethernet, and Windows 7 Starter.

Technical Specifications Square K Table Kiosk

Dimensions: H400 x W600 x D600
